Note: End the cycles if the scene becomes unsafe or you cannot continue performing CPR due to exhaustion. To see the steps to perform CPR in action, watch our video Putting it All Together: CPR – Adult. Or, for online, in person and blended training courses, visit our CPR Training Page.

### **CPR Steps | Perform CPR | Red Cross**

CPR for an Infant If providing CPR for an infant the ratio of compressions to breaths remains the same but the method of performing compressions changes. For an infant you should use 2-3 fingers in the center of the chest on the lower half of the breast bone to compress the chest about 1 ½".

### **2019-2020 CPR Guidelines American Red Cross (Review)**

When two rescuers are present, performing CPR on a child is the same as performing CPR on an adult, except that the compression ventilation ratio when 2 rescuers are present drops to 15:2. One or two hands may be used to compress the chest to a depth of 1/3 the diameter of the chest. We'll discuss using an AED on a child later on.
